

# TIGER ELECTRIC WINCH J SERIES

Tiger range of winches are all of planetary design, rugged in construction and engineered to exacting standards. Built with a precision two stage planetary gear box, they feature quality roller bearings throughout. The winch is supplied with a high starting torque motor, designed and manufactured specifically for hauling and hoisting applications. An independent electro magnetic failsafe disc brake provides safe, easy load control. The new and improved J Series Tiger features a low voltage 10 metre push button pendant control with E Stop as standard.

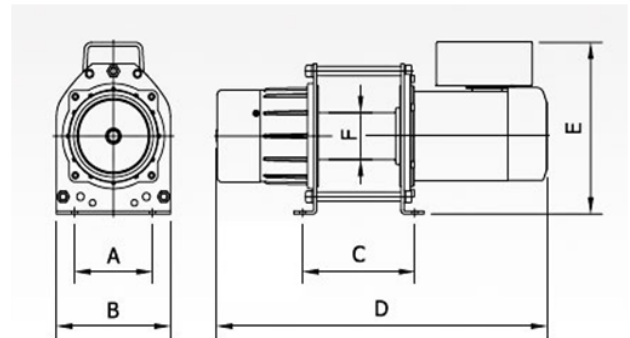

## Applications

- Boat ramp winch
- General lifting
- Positioning caravans or large trailers in confined areas
- Lifting sullage pumps
- Agricultural environments, water pump installation and removal

## J Series Standard Features

Pre-wired for 240V Single Phase with a standard 3 pin plug  
 Supplied with wire rope and safety hook  
 Low voltage push button pendant control with 10m lead
