

BOAT RAMP, SLIPWAY AND PUMP WINCH

Model G&W 4500 The Silent Option

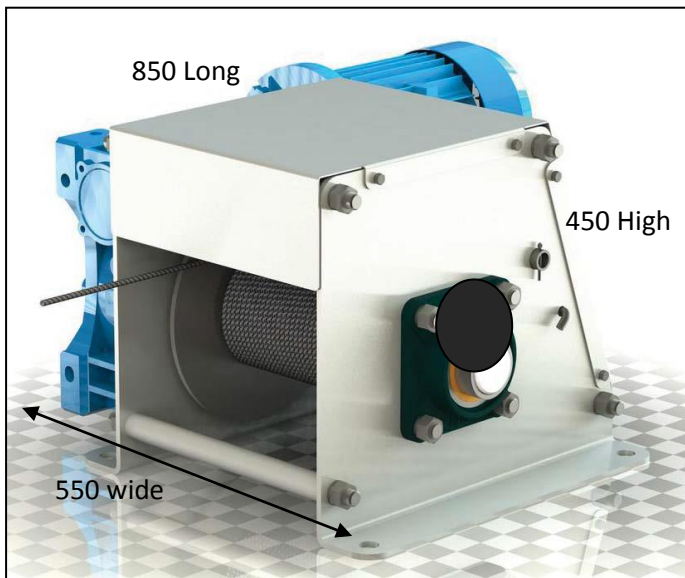

We manufacture these in our factory in Brisbane, we will happily modify these winches to suit your individual needs. This is a serious robust winch which has been designed for a variety of hauling applications, ideally suited as a slipway, boat ramp, and water pump winch.

Driven by a self-braking worm gear transmission providing a quiet, safe, maintenance free operation coupled to a purpose built powerful 240V electric brake motor. The drum, frame and guards are fabricated in quality steel for strength and endurance.

Features:

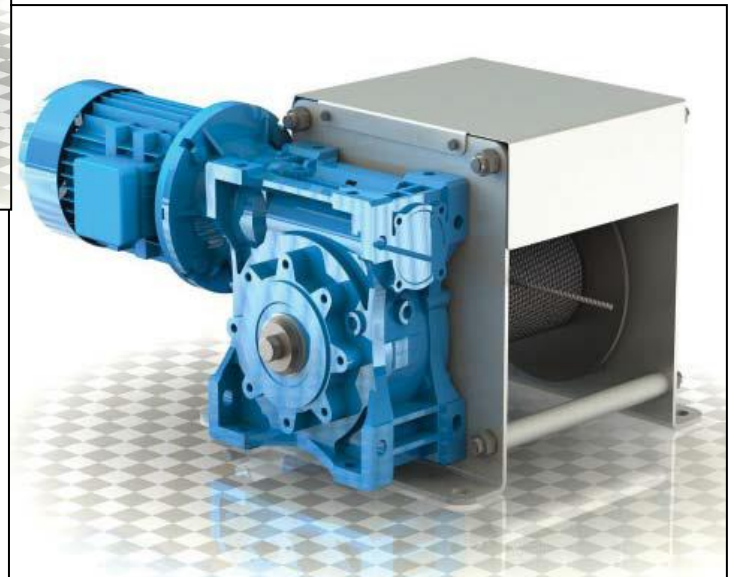

- Drum frame and guards are all of heavy duty steel construction
- Self-braking Worm gear reduction sealed for life
- End support bearing sealed for life
- Virtually maintenance free
- 1.7kw single phase 240V electric brake motor
- Wired with low voltage pendant controls & 3 pin plugs
- Supplied with 30m of 9mm dia aircraft cable
- Max winch drum storage capacity 70m of 9mm dia
- Capacity: 1500kg line pull at 4.25m/min 1ST layer
- Capability: Haul boat and wheeled trailer of 4500kg up 12.5 degree ramp
- Average line speed: 5.5 m/min
- Weight: 80kgs
- Based on a rolling load over good quality surface

Bolt Hole Centres "240 x 256"

Options:

- Wireless remote control
- Rope tensioner
- Synthetic rope
- Wall mounting feet
- Three phase 415V electric brake motor
- Motor can be fitted vertically for when space is a premium.
