**PLEASE TAKE A MINUTE – THIS MAY SAVE A LIFE
OR AT THE VERY LEAST YOU MIGHT FIND THIS INTERESTING**

We have been manufacturing and servicing Blue Series Winches since 1968, they are incredibly durable, safe and fantastic value for money. Your Blue Series Winch is fitted with a multi disc brake system which is second to none.

Whichever Blue Series model you make yours they all incorporate a safety low voltage 24 Volt Pendant Control system with 10 metres of pendant control wire complete with an emergency stop button.

What does all this mean to you and your family

It means you can have absolute confidence and peace of mind when using your winch, if for any reason the power is shorted out or the supply interrupted, or if you have to leave your winching operation for any reason the brakes are applied immediately. You can be assured the multi disc brake safety system will absolutely stop and hold your load.

We have hundreds of these beautiful, tough little units in service in some of the most severe circumstances, for example where they are close to water such as pontoons etc. This is where the low voltage controller comes into its own, let's say the controller gets broken and the internal wires are exposed or it is submerged in water, a tingle is all you will receive.

The controller being low voltage 24 Volt power – not 240 or 415 Volt - cannot "hurt" you. Your Blue Series Winch is one of the very few to offer this safety system on 240V as well as 415V winches.

For that little added safety and security, the pendants on our Blue Series Winches have a quick disconnect system so when your winch is not in use, no one else can tamper with it.

WIRELESS REMOTE SYSTEM

Please check out this brilliant option. Your Blue Series Winch is so easy to use with this simple option. The best news of all is, as far as we know your Winch is one of the only winches that offer a completely wireless system whilst retaining your pendant control at the same time. This is fantastic news, if a flat battery may occur in your wireless system, you will still have backup. If a 24V pendant controller is broken, you will still have the wireless opportunity.

DON'T FORGET WE OFFER A FULL 2 YEAR WARRANTY ON ALL OUR PRODUCTS
